

eTrust[®] Anti-Spam

Complete Spam Protection

eTrust[®] Anti-Spam

CA's eTrust Anti-Spam is today's safest, most effective and easy-to-use spam filter. It ensures you receive messages from contacts you know, while protecting you from contacts you don't. There are no rules to create or manage: eTrust Anti-Spam does it all for you. It works seamlessly with Microsoft Outlook and Outlook Express to block 100% of unwanted spam, keeping you in control of your Inbox.

Did You Know?

- More than 40% of all email is unsolicited, unwanted spam
- 30% of all spam is relayed by compromised home and home office PCs (Source: FTC)
- Two-thirds of spam is deceptive or false and violates the law (Source: FTC)
- Spam is one of the most pervasive problems facing consumers today (Source: CNet)

Comprehensive Spam Detection

Stop spam before it can compromise your PC and your privacy. eTrust Anti-Spam only allows messages from your approved senders to reach your Inbox – all other mail is quarantined for later review. eTrust Anti-Spam offers simple-to-use yet powerful features that allow you to quickly and easily gain control of your Inbox.

Why eTrust Anti-Spam?

Based on the same award-winning capabilities that earned the PC Magazine Editors' Choice award three consecutive years (2003-2005), the whitelist technology in eTrust Anti-Spam effectively blocks 100% of unwanted email.

Easy to Use

Specifically designed to make spam protection simple and trouble-free.

- Scans your contacts folder and email folders during installation to create a list of approved people with whom you communicate
- Blocks 100% of spam by allowing only messages from your approved senders list to reach your Inbox – all other email is quarantined for you to review later
- Automatically updates your list of approved senders as you send and receive messages, or as you periodically review and accept quarantined messages
- Works simply and easily – no complicated content filters to set up or manage
- Integrates seamlessly with Microsoft Outlook and Exchange – you can access all features directly from the toolbar in Outlook and Outlook Express

Affordable

Your one-year subscription delivers outstanding value and superior protection.

- FREE product upgrades, so your PC is always protected with the most up-to-date versions
- FREE unlimited 24 x 7 web support, plus access to our rich knowledge base and helpful online tools

eTrust Anti-Spam

Complete Spam Protection

Easy to Trust

CA provides software to over 95% of Fortune 500® companies.

- Proven easy-to-use and effective spam filter, blocking 100% of unwanted, unsolicited emails

Distinctive Features and Functionalities

- **Anti-Phishing and Fraud Protection** – uses industry-standard authentication methods to determine if an email is actually from the sender indicated on the message, and displays a clear visual warning on suspicious emails.
- **Protects Multiple Email Accounts** – monitors inbound messages for all of your Microsoft Exchange and any POP3 mail accounts you have configured in Outlook.
- **Email Search*** – creates a comprehensive search index of the information stored in Outlook, so you can quickly and easily find messages, attachments, appointments, contacts, journal entries and notes.
- **Suppresses New Mail Notification for Spam** – only notifies you when new mail is received from your white list of approved senders. Mail notification is suppressed when inbound messages are diverted to the quarantine folder.
- **Supports Bonded Sender** – allows mail from legitimate senders of commercial email (e.g. confirmations from Amazon) to be delivered to your Inbox
- **International Language Support** – properly filters spam sent in any language and automatically displays German, French, Italian, Spanish, Brazilian Portuguese, Chinese, Japanese and Korean based on your Windows language settings
- **Spam Score** – Automatically 'scores' the spam in your Quarantine folder, allowing you to sort your quarantined mail based on its likelihood of being spam. This helps you easily determine which messages are most likely to be spam, and allows you to take the appropriate action.
- **Automatic Updates** - Notifies you when product updates are available for download, providing you with the latest features to defend against spam.

* For English-language Outlook and Outlook Express only
